

🌐 Waseem UXUi 2.0 – Theme Documentation

Welcome to the official documentation for the ****Waseem UXUi 2.0**** Shopify Theme. This guide will help you install, customize, and optimize your store using this powerful and modern Shopify 2.0 theme.

📖 Overview

****Waseem UXUi 2.0**** is a high-performance, visually appealing Shopify theme designed for speed, UX excellence, and conversion. It is ideal for fashion, electronics, beauty, home, and lifestyle brands.

📁 File Structure

waseem-uxui-2.0/ 📁 assets/ # CSS, JS, and image assets 📁 config/ # theme settings schema 📁 layout/ # main layout files (theme.liquid)
📁 locales/ # translation files 📁 sections/ # homepage and custom sections 📁 snippets/ # reusable code blocks 📁 templates/ # page, product, collection templates 📄 README.md # theme info

🛠️ Installation

1. Login to your Shopify Admin
2. Go to **Online Store > Themes**
3. Click **Upload theme**, select the `.zip` file
4. After upload, click **Customize** to start editing your store

🛠 Theme Customization

Homepage

- Drag and drop dynamic **sections** (sliders, collections, banners, blogs, testimonials, video, etc.)
- Customize section padding, alignment, text, and colors
- Enable/disable sections per device (desktop/mobile)

Header

- Upload logo (SVG, PNG, JPG)
- Enable **sticky header**
- Enable mega menu or dropdown menus
- Add announcement bar

Product Page

- Enable product gallery (slider, zoom, lightbox)
- Show stock level, SKU, vendor, tags, metafields
- Add tabbed content (e.g., description, reviews, size guide)
- AJAX add to cart enabled
- Sticky Add to Cart option

Collection Page

- Enable filters by tag, type, vendor, price
- Choose layout: grid/list view
- Add custom banner/image for each collection
- Control product per row (mobile & desktop)

Blog & Article

- Show author, date, tags
- Add featured image, table of contents
- Enable related articles

Cart Drawer

- Instant AJAX cart with upsell and notes support
- Show cart count on sticky icon or header

🌐 Global Settings

- Enable light/dark mode
- Choose base font and headings font
- Set brand colors, button styles, and border radius
- Add custom CSS/JS globally

📱 Mobile Optimization

- Fully responsive with touch-friendly sliders and menus
- Optimized font scaling and padding for all screen sizes
- Collapsible sections for better readability

🛒 Shopify 2.0 Features Used

- JSON templates for page-level customization
- Dynamic blocks inside sections
- App blocks support
- Metafield support on product and collections

📌 Tips for Better Performance

- Optimize image size before uploading
- Use Shopify's built-in lazy loading
- Minimize the number of enabled sections per page
- Keep app usage minimal to reduce JS conflicts

📌 License Activation (Optional)

You can generate a license key via the license generator tool and validate it before theme deployment.
For more info: [License Generator Tool](#)

📌 Troubleshooting

Issue	Solution
-----	-----
Theme not saving changes	Clear browser cache or disable conflicting apps
Filters not working	Ensure correct tags and product types are set
Fonts not loading	Double check font URL or theme settings

| Slow site | Minimize high-resolution images and third-party scripts |
